**Green Darner Dragonfly**  
*(anax junius)*

**Twelve-spotted Skimmer Dragonfly**  
*(libellula pulchella)*

**Twelve-spotted Skimmer Dragonfly**  
*(libellula pulchella)*

**Damselflies**  
*(Ceriagrion tenellum)*

**Blue Damselfly**

*(Enallagma cyathigerum)*

Damselfly eggs hatch in water as nymphs, which feed on small aquatic insects, tadpoles, and small fish. After a few days, the nymphs climb up onto a suitable stem and moult into adult damselflies. The adult damselfly then sets out in search of lunch - mayflies, moths, bees, and bugs - and a mate.

**White-faced Meadowhawk Dragonfly**

*(Sympetrum obtrusum)*

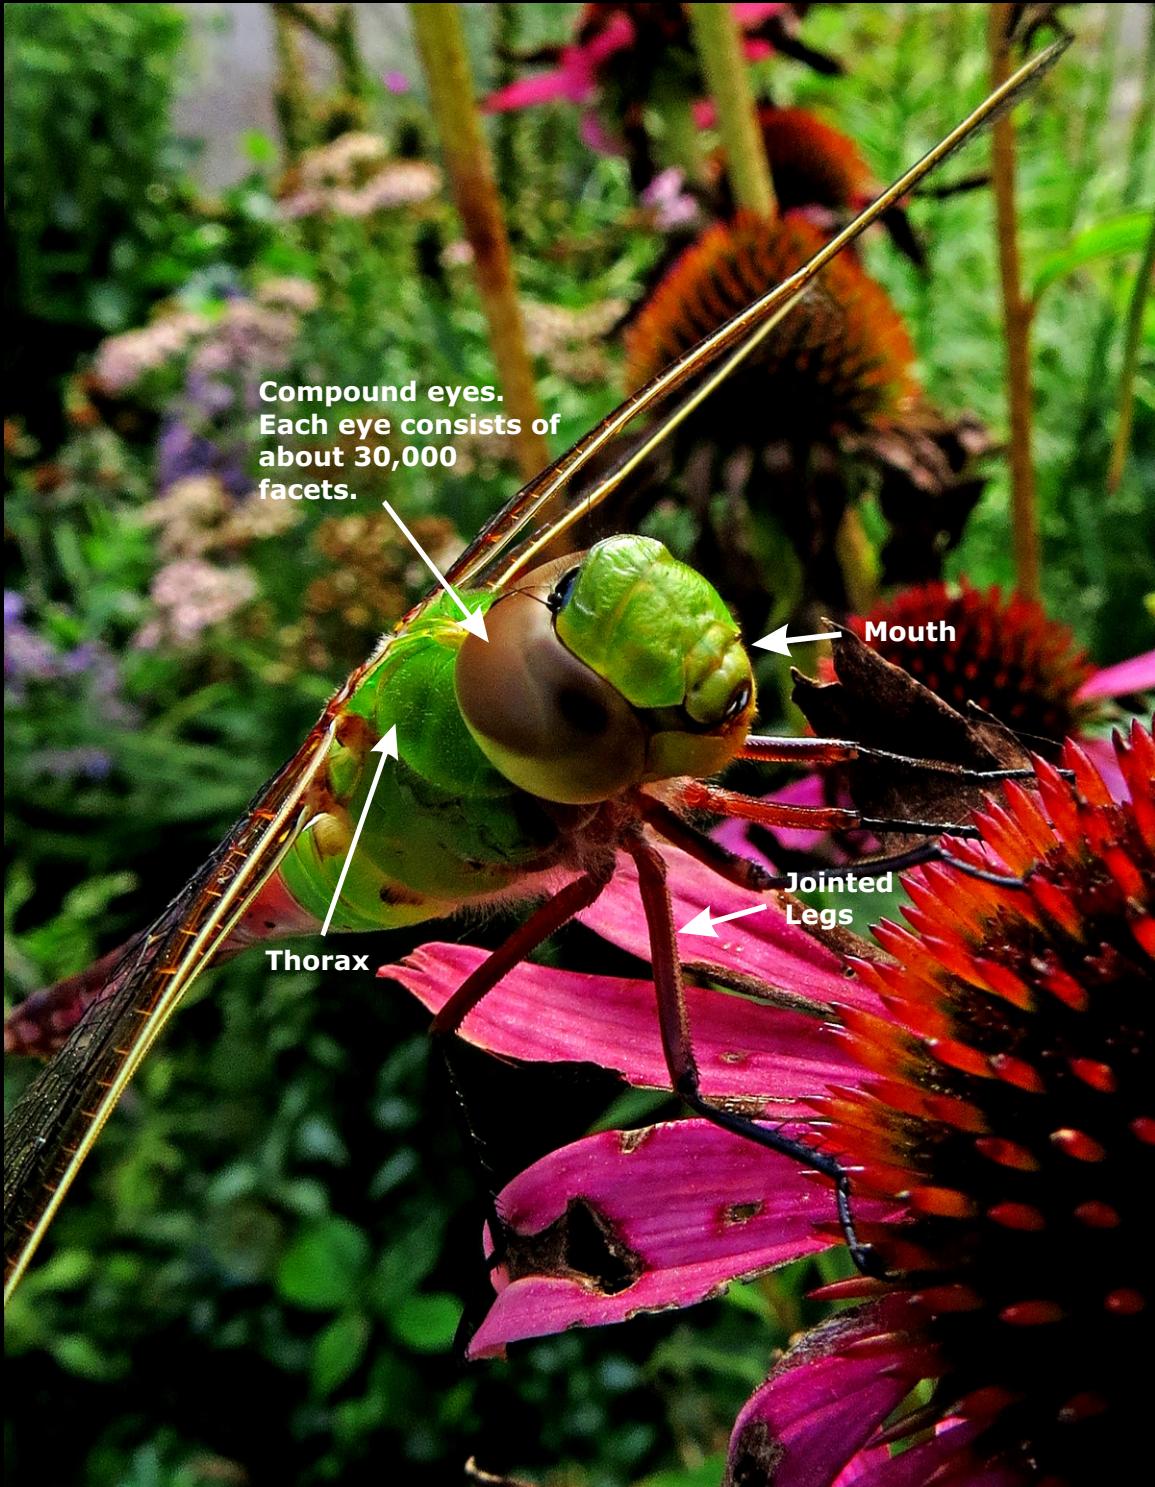

**Damselfly**  
(*Lestes viridis*)

**Damselflies**  
(*Ceriagrion tenellum*)

**Dragonfly**  
(*anisoptera*)

**Green Darner Dragonfly**  
*(anax junius)*

**Blue Nose Dragonfly**  
(*Platycephala eliseva*)

**Dragonfly**  
(*Aeshna grandis*)

**White-faced Meadowhawk Dragonfly**  
*(Sympetrum obtrusum)*
