**Ruby Tiger Moth**  
*(Phragmatobia fuliginosa)*

(I'm not at all sure that this is a Ruby Tiger Moth.  
Based on coloring only, it is my best guess.)

**Green Bottlefly** (*Lucilia sericata*)  
dining on a Dianthus Pink.

**Bumble Bee (*Bombus*) and a  
Green Bottle Fly (*Lucilia sericata*)**  
sharing the bounty.

**Asian Ladybeetle** (*Harmonia axyridis*)

**Garden slug** dining on a Purple Coneflower.

**Syrphid fly**  
(*Eristalis pertinax*)  
i.e. **Drone fly**  
(*Eristalis tenax*))

**Syrphid Flies** (*unsure of species*)  
In Britannia meadow

## 1. Goldenrod Crab Spider (*Misumena vatia*)

Alarmed by the looming camera, the spider darted for safety beneath a petal.

2

3

**Bumble Bee (*Bombus*)**  
If you have ever wondered  
what the back end of a  
Bumble Bee looks like,  
your quest is over.

A spider dining on a fly.

Two Beetles **Baris sp. Baris** (*Bellis perennis*)  
on a daisy in a neighbourhood garden.

**Japanese Beetle (*Popillia japonica*)**

**This might be a Paper Wasp** - on the outside  
looking wistfully in.

**Crab Spider**  
dining on a  
**Green bottle fly**  
on a Garlic Chive

I can't be sure, but this might be an **Orange Tip Caterpillar**.
